Subject: Microsoft Case

You need to get off the back of Microsoft.   Microsoft has provided us with
standardization which has increased the productivity in application
writing,
as well as, the use off OS and office components.   Every corp.,
including the government has benefited.

Besides,   I observe prejudice.   Why are you not equally concerned about
the harmful internet, media monopoloies ie. AOL and COMSAT?   In my
opinion,   they exist only to be damaging.
